ICD-10-CM Guidelines

- Code all documented conditions that coexist at the time of the visit and require or affect patient care treatment or management.
- Do not code conditions that were previously treated and no longer exist. However, history codes may be used if the historical condition has an impact on current care or treatment.
- * A dash (-) after a code indicates additional digits are required
- * All diagnosis must be documented and supported in the medical record
- * **GREEN** ICD-10-CM codes are new codes effective 10/1/2024 and may be associated with the CMS HCC v28 model
